**Subject:** TN UST response to question about 6016 Chapman Highway  
**Attachments:** 2010 02-09 a Query for street named Chapman in Knoxville.xls

Mr. Ragle:

The Division of Underground Storage Tanks has searched its database of registered UST sites and the search returned no results for 6016 Chapman Highway. Please see the attached file listing all known sites on a street with the name containing "Chapman" in Knoxville. Please note that three sites on the list did not provide a 911 address.

The division needs to inform Furrow Auction Company of the possibility that tanks could exist at a site that the division would be unaware of because:

1. A tank owner may not have registered the tanks as they were required to do by the TN UST Act; or
2. The USTs at a site do not require the tank owner to notify the state of their existence because they are not regulated by the TN UST Act.

If you have any questions, please contact our staff in the Knoxville Field Office at (865) 594-6035.

Thank you for contacting Ask TDEC.

Stan Boyd, director  
Tennessee department of Environment and Conservation  
Division of Underground Storage Tanks

To Whom It May Concern:

We have been hired to auction off the property referenced below. At first, we were told that there were no underground storage tanks on the premises, but have now been informed that there may have been tanks located on the property. Could you please help us to determine if any underground tanks are located on the property or if there were underground tanks that have been removed? Also, please let us know if there are any environmental concerns that we should be aware of.

6016 Chapman Highway  
Knoxville, TN 37920

Your help is most appreciated.
